SUBJECT: WEATHER X™ SILICONIZED POLYESTER COIL COATING SYSTEMS FORTY (40) YEAR LIMITED WARRANTY For HDG Steel, (G90+) and Zinc-Aluminum Alloy Steel for Metal Building Components.

We are pleased to present you with our forty (40) year WeatherX™ Siloconized Polyester limited Warranty, which is below.

1. Our WeatherX™ Siloconized Polyester family of coil coatings, properly applied to HDG steel (G90+), and Zinc-Aluminum Alloy steel for commercial or industrial building parts will meet the following standards from the date of installation.

WILL NOT crack, check or peel (lose adhesion) for forty (40) years. But this does not include minute fracturing, which may occur in proper fabrication of the building parts. **Failure due to substrate corrosion is excluded.**

SIDEWALL PANELS [for forty (40) years from installation of forty and one-half (40-1/2) years from application]

A. WILL NOT chalk in excess of ASTM D-4214-98 method A (D659) number eight (8) rating at any time for forty (30) years.

B. WILL NOT change color more than five (5.0) Hunter ΔE units as determined by ASTM method D-2244-02. Color change shall be measured on an exposed painted surface that has been cleaned of surface soils and chalk, and the corresponding values measured on the original or unexposed painted surface. It is understood that fading or color changes may not be uniform if the surfaces are not equally exposed to the sun and elements.

ROOFING PANELS [for forty (40) years from installation of forty and one-half (40-1/2) years from application]

A. WILL NOT chalk in excess of ASTM D-4214-98 method A (D659) number six (6) rating.

B. WILL NOT change color more than seven (7.0) Hunter ΔE units as determined by ASTM method D-2244-02. Color change shall be measured on an exposed painted surface that has been cleaned of surface soils and chalk, and the corresponding values measured on the original or unexposed painted surface. It is understood that fading or color changes may not be uniform if the surfaces are not equally exposed to the sun and elements.

2. In case of a complaint, you will provide access to us and assist us as necessary in determining the exact cause of the failure. ASTM and NCCA testing procedures will be used.
3. If our WeatherX™ Siloconized Polyester family of coil coatings fail to comply with our limited Warranty, we will pay for labor and material reasonably necessary to repaint, repair or replace, at our option, the building part showing the failure. However, our liability shall not exceed the purchase price paid for the metal panels. We shall not be liable to any person or entity for any incidental or consequential damages, including lost profits or lost use of material. We shall not be liable to any person or entity for claims for property damage or personal injury. In order for the warranty to be in effect, however, you must notify us in writing of the failure within thirty days of the discovery of such problem and provide documentation we may require. If we repaint, we will use normal painting practices using WeatherX™ Siloconized Polyester or other suitable alternatives. This Warranty also applies to the part we repainted, repaired, or replaced, but only for the unexpired portion of the Warranty period applicable to the original part.
